

Calastone Order Routing

Overview

Calastone Order Routing automates the transaction flow between trading parties in the mutual funds industry, providing a fully interoperable global solution.

By connecting to the Calastone Transaction Network, fund distributors are able to seamlessly place and route orders directly to fund managers. Automated transaction and pricing notifications are initiated and distributed as part of our single automated order routing process, thus providing early notification of receipt and price confirmation.

Calastone enables clients to connect and communicate with trading counterparties in any messaging standard or protocol (including ISO 20022/15022, FIX protocols and many proprietary formats). We can also connect directly to other messaging networks, including SWIFT and FIX, on our clients' behalf.

Through this single connection to our network, clients benefit from full straight-through-processing (STP), delivering immediate operational efficiencies and removing the risk associated with manual processing. By connecting to our network, users have access to our full global community of over 14,000+ trading links, offering easy access to new markets and funds.

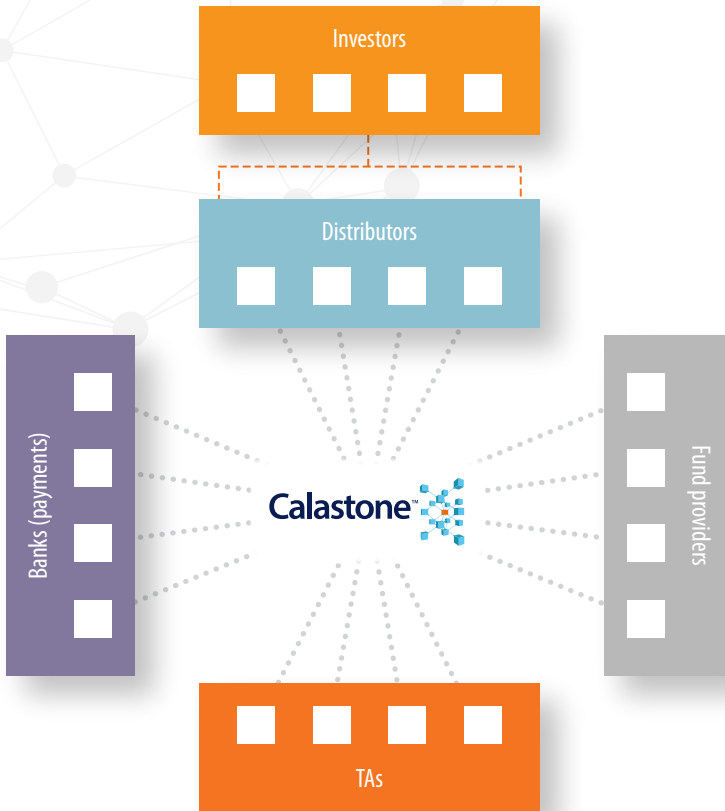

Product Benefits

- Interoperable – supporting over 190 different message formats
- Global coverage – 14,000+ trading links in 34 territories
- Full operational support – proactive real-time monitoring
- Easy implementation – no upfront costs or scaled development required
- Single point of access – connect to SWIFT, FIX and other messaging networks

Features

Calastone Transaction Network

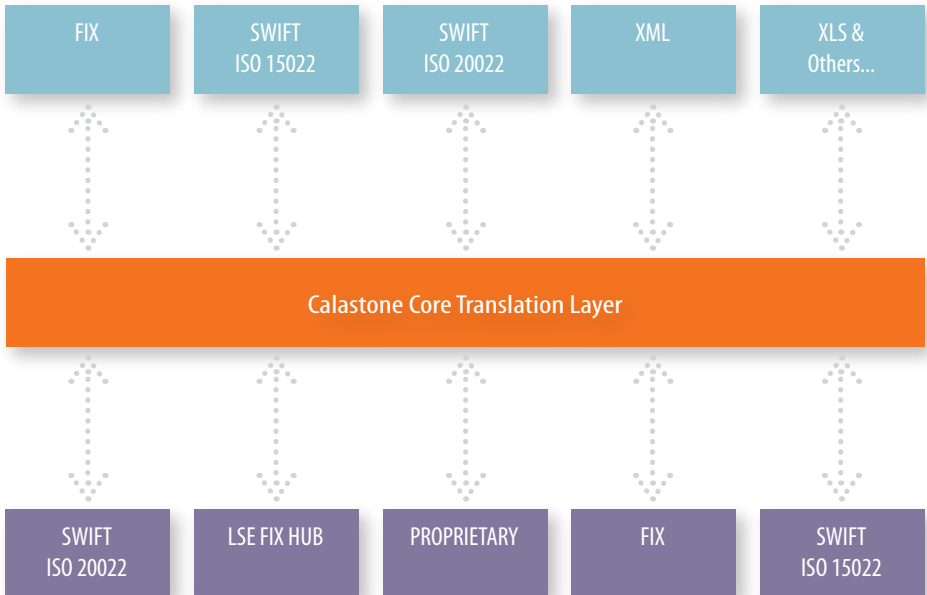

- Connect to any format from any format
- ISO 2022 compliant
- Point to point connectivity using business logic
- Proven business continuity structure
- Dedicated operational support, 24 x 5.5
- Data archiving and retrieval

How does it work?

Calastone's Order Routing is unique in its approach. We support all message types from the sender and translate to meet the receiver's own requirements and provide the same in reverse. This means the service can quickly and easily be adopted by both parties, reducing upfront and maintenance costs.

Interoperability

"The decision to use Calastone was a no brainer given the ease of implementation, risk and cost reduction benefits, and increased operational efficiency"

Manulife, Associate Director

"We are pleased to be connected to Calastone's transaction network. Doing so is consistent with our commitment to continue to drive automation within the funds industry to help lower costs and reduce risk for both ourselves and our clients"

Invesco, Head of European Transfer Agency
